Summary

Computer Engineering student focused on NLP, computer vision, intelligent data systems, and edge-based computing. Builds practical AI systems combining language, vision, and on-device/distributed computing, with hands-on project and research experience. Currently exploring computational language research, studying Japanese, and continuously learning emerging technologies.

Education

Marathwada Mitra Mandal's College of Engineering, Savitribai Phule Pune University — Pune
B.E. in Computer Engineering | CGPA :- 9.33/10 (Cumm. of 6 semesters) — *Aug 2023 – Present*

Technical Skills

Languages	:	Python, Java, SQL, C++ JavaScript, PHP, HTML, CSS
Frameworks	:	React.js, Angular, Node.js, Django, Flutter, Unity, REST APIs
Libraries	:	PyTorch, scikit-learn, OpenCV, NumPy, Pandas, Tesseract, OCR
Databases	:	MongoDB, PostgreSQL, MySQL
Dev Tools	:	VS Code, Git, Gitlab, Git, Docker, Jupyter Notebook, Anaconda, Android Studio, Figma, WordPress

Experience

AI/NLP Intern — Jan 2026 – April 2026
ConvenioTech Software Systems Pvt. Ltd. — *Onsite – Pune*

- Developed a transformer-based document comparison system for aviation regulatory (DGCA) updates using **local LLMs**, integrating OCR and PDF parsing for policy extraction and preprocessing.Built a **CUDA-accelerated NLP** pipeline for embedding generation and parallel semantic similarity analysis.
- Engineered a bilingual (German/English) **lead-generation chatbot and CRM tool** for a German enterprise, with WordPress integration.

Full-Stack Team Lead Intern — Jan 2026 – Aug 2026
URJA Japanese Consultancy Pvt. Ltd. — *Remote – Pune*

- Leading development of MVP for internal workflow system. Designing backend architecture and database structure. Coordinating small dev team and feature planning. Implementing core modules across frontend and backend.

Google Developer's Group (GDG) Design and Content Head — Aug 2025 – Aug 2026

Projects

Patient Management System (Deployed) — *React.js, PHP, MySQL, Git, Hostinger* — Deployed Project

- A comprehensive web-based solution for managing patient records, appointments, and administration.
- Developed and deployed a Patient Management System supporting patient records, appointments, prescriptions, and administrative workflows.

SIH :- RRH using AR/VR technology (SIH-Intercollege Winner 2025) — *Node.js, Figma, MySql, Unity* — Source Code

Parallel Paradox (Gamethon- 2nd Runner-Up Winner) — *Unity, Android Dev*

Certifications

- C++ (MBTB-certification), Java Programming (MBTB-certification)
- Cyber Security and Networking (OPSWAT)
- Machine Learning and MLOps (Udemy)
- Fundamentals of Operating System (NPTEL)
- Japanese Language Proficiency Test (JLPT) -N4 Level Qalified
